Legislation still on the table

The 2016 legislative session will be the second year of a two-year session. Bills that made their way through the process in 2015 are still on the table for action. Get an overview of remaining education and governance legislation that could impact your school district.

Emily Heatwole, *Director of Governmental Affairs, SC Department of Education*

Federal legislative update

As Congress considers a number of imminent priorities, from preventing a government shutdown to a new Speaker of the House, landmark education laws are pending during the final days of this session. The Elementary and Secondary Education Act (ESEA) is in the middle of a long-awaited reauthorization and overhaul. House and Senate committees are moving forward to reauthorize child nutrition programs and update laws governing student data. Fiscal Year 2016 appropriations are impacted by budget negotiations that will hopefully yield sustained investments in our students and schools. This session will provide a federal legislative update on these and other issues impacting our students and school districts, and offer insight on how to maximize your federal advocacy efforts as elected officials who are key stakeholders in national education policy and local governance.
